

NOVITA Plus

56715 – Novita Plus with flat base

NOVITA Plus

APPLICATION AREA

A particularly convenient and lightweight machine for cutting all kinds of textiles for layers and up to approx. 8 mm high, depending on the type of material. Especially suitable for wool and soft materials. Either the flat base or the cutting skid may be used. The lubricator decreases friction between the blade and counter blade, enabling laminated goods to be cut.

The Novita Plus is fully insulated and VDE tested. A special combination gear mechanism gives the machine a unique motor speed strength across the entire load range. The motor only gets moderately warm, preventing overload and guaranteeing the highest protection and service life. The blade guard is easily and infinitely adjustable and does not obscure blade visibility. The operating handle for the grinding device has been shaped in such a way, that the blade can be sharpened using one hand, even during the cutting operation. Handling and management of the machine is easy and balanced.
